

**Title of the Talk-** Infusing Creativity and Collaboration in Teaching

**Date of Presentation:** 18 January 2026

**Presenter:** Ms Sonia Vikas Kapoor, AECS-2, Mumbai

**Abstract for Talk**

This presentation provides an overview of the key initiatives, achievements, and best practices of the **Atomic Energy Education Society (AEES)** in delivering inclusive, value-driven and future-ready education across its network of schools. Aligned with the vision of NEP 2020, the presentation highlights the sustained efforts of AEES in promoting academic excellence, equity, and holistic development among students from diverse socio-economic backgrounds.

The presentation outlines major organisational milestones, including student enrolment profiles, academic outcomes, higher education pathways, student achievements in co-curricular and inter-AEES activities, enrichment programmes and community engagement initiatives. It also showcases the integration of ICT-enabled teaching-learning practices, peer review mechanisms for school improvement, structured teacher capacity-building programmes, and initiatives that support continuous institutional growth.

A significant highlight is the AEES Conclave, conducted to provide a professional platform for teachers to learn, share innovative practices, and express their views through paper presentations, panel discussions, poster presentations and teaching-aid exhibition.

The presentation also reflects the emphasis that AEES lays on alumni engagement for student enrichment, educational visits to different sites (DAE and others), activities supporting national initiatives such as Poshan Abhiyaan and Rajbhasha and its active presence on social media to enhance outreach and communication. Together, these efforts reaffirm the commitment of AEES to nurturing responsible, competent and future-ready learners.
